Altaley Mining Retains Advertising Group and Announces Upcoming Webinar

Vancouver, British Columbia, September 28, 2021

[Altaley Mining Corporation](#) (“Altaley” or the “Company” (TSX-V: ATLY; OTCQX: ATLYF; Frankfurt: TSGA) announces the engagement of Future Money Trends, LLC, Gold Standard Media, LLC, Portfolio Wealth Global, LLC and Wealth Research Group, LLC, (the “Advertisers”) to provide financial publishing and digital marketing services to the Company. The term of this agreement shall be for a period of six months beginning October 1, 2021. The Company shall pay only a cash fee to the Advertisers totaling US\$350,000 in four equal installments of US\$87,500 each, with the first installment due upon signing of the agreement, and subsequent installment due every two months until fully paid. The Advertisers are corporations whose principals, Kenneth Ameduri and Juliet Ameduri of Austin Texas, will be providing the services to the Company.

The agreement is subject to the Company’s filing requirements with the TSX Venture Exchange.

HAVE QUESTIONS? Management will be available to answer your questions following the presentation on the webinar platform. You may also submit your question(s) beforehand via email to altaley@rbmilestone.com

About Altaley Mining Corporation

Altaley Mining Corporation is a Canadian based mining company with two 100% owned Mexican gold, silver, and base metal mining projects.

Altaley's Tahuehueto Gold Mine project is in north-western Durango State, Mexico where construction has been advanced to an estimated 70% of completion. With the recently announced US \$25 million

funding package, Altaley has the funding available to finish construction of its 1,000 tonne per day processing facility and related mine infrastructure to initiate production of gold, silver, lead, and zinc in concentrates at Tahuehueto. The Company is targeting initial pre-production by the end of 2021 and ramping up to full production capacity during Q1 2022.

Campo Morado is an operating polymetallic base metal mine with mining and milling equipment currently producing at an average rate of approximately 2,000 tonnes per day, Campo Morado is currently estimated to be Mexico's 6th largest zinc producer.

CAUTIONARY NOTE REGARDING PRODUCTION DECISIONS AND FORWARD-LOOKING STATEMENTS

It should be noted that Telson declared commercial production at Campo Morado prior to completing a feasibility study of mineral reserves demonstrating economic and technical viability. Accordingly, readers should be cautioned that Telson's production decision has been made without a comprehensive feasibility study of established reserves such that there is greater risk and uncertainty as to future economic results from the Campo Morado mine and a higher technical risk of failure than would be the case if a feasibility study were completed and relied upon to make a production decision. Telson has completed a preliminary economic assessment ("PEA") mining study on the Campo Morado mine that provides a conceptual life of mine plan and a preliminary economic analysis based on the previously identified mineral resources (see News Release dated November 8, 2017, and April 4, 2018).

Statements contained in this news release that are not historical facts are "forward-looking information" or "forward-looking statements" (collectively, "Forward-Looking Information") within the meaning of applicable Canadian securities laws. Forward Looking Information includes, but is not limited to, disclosure regarding the planned recommencement of mining operations at Campo Morado; and other possible events, conditions or financial performance that are based on assumptions about future economic conditions and courses of action; the timing and costs of future activities on the Company's properties, such as production rates and increases; success of exploration, development and bulk sample processing activities, and timing for processing at its own mineral processing facility on the Tahuehueto project site. In certain cases, Forward-Looking Information can be identified using words and phrases such as "plans," "expects," "scheduled," "estimates," "forecasts," "intends," "anticipates" or variations of such words and phrases. In preparing the Forward-Looking Information in this news release, the Company has applied several material assumptions, including, but not limited to, that the current exploration, development, environmental and other objectives concerning the Campo Morado Mine and the Tahuehueto Project can be achieved; that recommencement of operations at Campo Morado will proceed as planned; the continuity of the price of gold and other metals, economic and political conditions, and operations. Forward-Looking Information involves known and unknown risks, uncertainties and other factors which may cause the actual results, performance, or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the Forward-Looking Information. There can be no assurance that Forward-Looking Information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on Forward-Looking Information. Except as required by law, the Company does not assume any obligation to release publicly any revisions to Forward-Looking Information contained in this news release to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.
