Telson Resumes Mining and Milling Operations at Campo Morado

Vancouver, British Columbia, January 28, 2020

Telson Mining Corporation (“**Telson**” or the “**Company**” (TSX Venture Exchange-TSN, OTC Pink-SOHFF, Frankfurt-TSGN (formerly SQ82)) is pleased to announce that it has resumed full scale mining and milling operations at its Campo Morado Mine as of January 26th, 2020.

The company has re-initiated milling operations at approximately 1750 tonnes per day, intending to increase throughput rate over the coming weeks towards 2000 tonnes per day or more. Underground mining operations have been underway for approximately two weeks moving mineralized material from the mine to the mill site.

“After suspending Campo Morado mining operations during August 2019 we are very pleased to be in a position to inform shareholders that improving metal prices and improved community relations have allowed us to resume full scale mining operations to re-initiate concentrate sales and cash flows” states Antonio Berlanga, CEO, “with the mine back in production the local community of Arcelia will once again have a major source of employment available and will benefit from the renewed economic activity.”

Private Placement Financing update

Telson has been marketing a non-brokered private placement as disclosed in a December 27, 2019 press release (the “Private Placement”) of up to 30,000,000 units (the “Units”) at a price of C\$0.10 per Unit for total proceeds of up to C\$3,000,000 and has completed subscription agreements with certain investors for total proceeds of approximate C\$1.89 million and is intending to conduct a first tranche initial closing on proceeds received by immediately filing for approval with the TSX.V exchange. The balance of the private placement offering remains open under existing securities exemptions to Accredited Investors, family, friends, and business associates of management as well as existing shareholders of the company. Qualified investors interested in participating in the remaining unsubscribed balance of the private placement are encouraged to contact the Company.

About Telson Mining Corporation

Telson Mining Corporation is a Canadian based mining company with two 100% owned Mexican gold, silver and base metal mining projects.

Telson's Tahuehueto mining project, located in north-western Durango State, Mexico is currently under construction having advanced to approximately 70% completion and waiting for final funding to finish construction of the processing plant and related assets to produce gold, silver, lead and zinc in concentrates within its own on-site mineral processing facility, with a designed capacity of at least 1,000 tonnes per day. The Company is targeting completion of construction during 2020, six to eight months after securing final funding.

Campo Morado is a polymetallic base metal mine with mining and milling equipment capable of producing up to 2,500 tonnes per day. Four months after purchasing Campo Morado, Telson brought the mine back into operation initiating preproduction in October 2017 and declared commercial production in May 2018, operating the mine continuously for 22 months until August 2019 when the project was put on care and maintenance as a result of declining zinc prices and community issues. With improving current conditions Telson just brought the mine out of care and maintenance and reinitiated mining and milling operations during January 2020.

Cautionary Note Regarding Production Decisions and Forward-Looking Statements

It should be noted that Telson declared commercial production at Campo Morado prior to completing a feasibility study of mineral reserves demonstrating economic and technical viability. Accordingly, readers should be cautioned that Telson's production decision has been made without a comprehensive feasibility study of established reserves such that there is greater risk and uncertainty as to future economic results from the Campo Morado mine and a higher technical risk of failure than would be the case if a feasibility study was completed and relied upon to make a production decision. Telson has completed a preliminary economic assessment ("PEA") mining study on the Campo Morado mine that provides a conceptual life of mine plan and a preliminary economic analysis based on the previously identified mineral resources (see News Release dated November 8, 2017 and April 4, 2018).

Statements contained in this news release that are not historical facts are "forward-looking information" or "forward-looking statements" (collectively, "Forward-Looking Information") within the meaning of applicable Canadian securities laws. Forward Looking Information includes, but is not limited to, disclosure regarding the planned recommencement of mining operations at Campo Morado; the ability to recommence outstanding payments to Nyrstar; and other possible events, conditions or financial performance that are based on assumptions about future economic conditions and courses of action; the timing and costs of future activities on the Company's properties, such as production rates and increases; success of exploration, development and bulk sample processing activities, and timing for processing at its own mineral processing facility on the Tahuehueto project site. In certain cases, Forward-Looking Information can be identified by the use of words and phrases such as "plans", "expects", "scheduled", "estimates", "forecasts", "intends", "anticipates" or variations of such words and phrases. In preparing the Forward-Looking Information in this news release, the Company has applied several material assumptions, including, but not limited to, that the current exploration, development, environmental and other objectives concerning the Campo Morado Mine and the Tahuehueto Project can be achieved; that recommencement of operations at Campo Morado will proceed as planned; that discussions with Nyrstar and the abeyance of any potential default proceedings will be completed in a timely manner and on reasonable terms, the continuity of the price of gold and other metals, economic and political conditions and operations. Forward-Looking Information involves known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the Forward-Looking Information. There can be no assurance that Forward-Looking Information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on Forward-Looking Information. Except as required by law, the Company does not assume any obligation to release
